Bute-Robson Plaza

Draft Concept

Explore potential for green rainwater infrastructure in the existing parklet

Staff are continuing to develop the design for the intersection and the nearby bus stop queuing areas.

Relocate public bike share station to maintain prime access while increasing space for other uses.

Introduce new pavement patterns with green rainwater infrastructure and in-ground lighting features at select locations.

Pedestrian safety improvements

Support the urban forest and increase resilience by planting large, long-lived trees.

Flexible space for special event programming.

Drinking fountain with dog bowl

Explore seating options for various uses - relax, people watch, hang out with friends, eat and/or drink.

Maximize plaza space and maintain clear delineation between the plaza and paths for walking, cycling, and rolling.

Connect to future Bute Greenway.
