

SITE OPPORTUNITIES

Walking loop

Extend to a 500 linear meter loop with distance markers and other features to support fitness

Green infrastructure

Incorporate features such as rain gardens to capture and clean rain water within the park; recognition of the buried stream along the west side of the park

Play area

Upgrades to the playground and extend the play space to take advantage of existing slopes

Plateau

Opportunity for a gathering space at the high point of the park to allow for parent supervision of the play spaces

Gaps in the tree canopy

Opportunities for infill and to increase the tree canopy overall

Low points on the grass field

Improve the field to remove hazards and maximize use for field users

Unsanctioned parking

Opportunities for barriers along the laneway edges to protect the existing mature trees and grass area

Grass field

Lack of field delineation, design the field for a variety of sports

Sloped field edge

Potential seating areas to watch sports games that is integrated into the slope

Mature trees

Protect and celebrate the existing mature trees

Park entrance

Develop a welcoming entry into the park away from the laneway
