A BIRD ON THE WING SOARS FROM OCEAN TO RIDGE

This concept emerges from the spiritually important Eagle, a symbol of accomplishment, courage and wisdom for the Musqueam, Squamish and Tsleil-Waututh cultures. Eagle soars through the sky on a journey, seeing the big picture and the small detail. Eagle represents ancestors who have passed before us, a spiritual messenger that guides us from the past to the future, looking over generations to come.

In the 'Eagle' concept, a car-free diagonal stretches through the new community creating a series of connected open spaces from the lower northeast entry to the southwest ridgetop lookout. The diagonal creates a flight along a pedestrian walkway lined by a 'waterway' wing to a central park and travels up to a mixed-use urban plaza and a potential transit station accentuated by three iconic "sentinel" buildings representing the MST partners, and finally ascends up the ridge wing to the watchmen's hill that frames dramatic views to downtown and the mountains.

CONCEPTUAL SITE PLAN OPTIONS

łən • tahim tl'a uxwmixw-chet • weave

A STRONG COMMUNITY FABRIC

This concept emerges from weaving, an activity that is intrinsic to Musqueam, Squamish and Tseil-Waututh cultures. Weaving interlaces stories and teachings into rich patterns that tell stories of who we are. Weaving uses materials that come from the land and that remind us of our close connection to the natural world. Weaving winds together old worlds and new into a unique fabric that carries important teachings for living today and that will last for many tomorrows.

In the 'Weave' concept, a fine-grained mobility and social space network winds around a central east-west pedestrian / cycling corridor. The central spine knits together three distinct neighbourhood hearts, coming together around a large north-south park. A hub of community / cultural amenities and retail spaces and a potential transit station is anchored by three iconic "sentinel" buildings representing the MST partners. Streets and pathways connect the new community with surrounding neighbourhoods through welcoming entries and permeable intersections, and link the city to the ocean. Rainwater management is woven through the community along pathways, intertwining infrastructure and place-making.

paq̓əs · sp'ákw'us · eagle

THE CONCEPT

The Eagle concept is defined by a sweeping parks and open space network. The "Diagonal", a car-free green spine, stretches from the lower northeast entrance to the lookout entry at the southwest corner, framing important views and linking a diverse series of open spaces and community amenities. Rainwater is designed to move through the open space network in the form of seasonal waterways, creating a wetlands channel along a pedestrian walkway. Four looped roads are integrated with the natural site topography, while a multimodal edge transforms the West 4th Avenue perimeter of the site.

Three iconic "sentinel" buildings frame a mixed-use urban plaza where a potential transit station may be located, marking a peak in building heights. A second peak is located on the east side of the site. Both high points are located inwards from the site edges, with height transitioning down toward adjacent existing neighbourhoods. Retail areas are concentrated along the northeast end of the Diagonal along a pedestrian walkway, and at the mixed-use urban plaza, next to a broader mix of residential, commercial and office spaces.

paq̓əs · sp'ákw'us · eagle

THE BIG IDEAS

A Diagonal spine

An accessible active transportation (car-free) corridor traverses the site northeast to southwest. Water is celebrated along the eastern portion of the Diagonal through channels that line a pedestrian walkway to allow for strolling and smaller gathering places animated by retail, cultural / community spaces and cafes.

Journey along the Diagonal

A procession of community amenities and open spaces provides distinct experiences as one travels across the site along the Diagonal: a welcoming entry at West 4th Avenue and Highbury Street, a pedestrian walkway, a central gathering space, and a mixed-use urban plaza with a potential transit station lead to a lookout entry and plaza atop the ridge adjacent to Trimble Park.

Responding to the topography

Streets and blocks are designed along ridge lines and shaped to respond to natural contours, enhancing mobility through the site by following and crossing the slope in accessible ways. Local pathways also follow the topography, providing more frequent connections through the site.

A Central Gathering Space

A central gathering space is created at the core of the site, offering a community hub by bringing together parks and open spaces in a forest canopy and natural setting, surrounded by cultural, community and recreational uses.

Mixed-Use Urban Plaza

Convenient and easy accessibility is created to a mixed-use urban plaza co-located with a potential transit station. The Diagonal car-free corridor steps down the ridge from the West Point Grey neighbourhood, to the plaza, and continues, down to West 4th Avenue and Jericho Beach Park.

New West 4th Avenue edge

The West 4th Avenue perimeter of the site is reimagined with new mobility and landscape features, creating a naturalized interface and multimodal edge for the Jericho Lands.

Skyline: Two Peaks

Distinct nodes are defined through building massing in two peaks. Three iconic "sentinel" buildings frame the urban plaza.

Framing and Transitions

Buildings are terraced to transition down to West 8th Avenue and along the Diagonal. Solar performance is optimized on public spaces along the Diagonal. The ridge and views to downtown are accentuated through building placement.

PARKS AND OPEN SPACE

Legend

- Park & Open Space Network
- Courtyard Spaces
- Rainwater Management
- Existing Trees
- Proposed Trees

- A car-free diagonal spine links together a park and open space network:
 - Approximately 20 acres of passive and active parks;
 - A welcoming entry plaza at West 4th Avenue and Highbury Street;
 - A pedestrian walkway envisioned as a social heart with rainwater channels, gathering spaces, and retail pavilions;
 - A large central gathering space for active and passive recreation, ecological, community, urban agriculture and cultural uses at the edge of the existing natural area;
 - A mixed-use urban plaza co-located with the potential transit station;
 - A lookout entry plaza that can serve as a cultural gathering space with views to the mountains, sea, and downtown.
- The ridge, toboggan hill, a portion of the existing natural area and many significant existing trees are retained, enhanced and celebrated, and new tree canopy is added.
- An active modes open space and rainwater corridor is introduced along West 4th Avenue, providing a continuous green transition to Jericho Beach Park.

MOBILITY NETWORK

Legend

- Local Street Network
- Primary Pedestrian Route
- Secondary Pedestrian Route
- Primary Cycling Route
- Other Cycling Routes
- ☀ Potential Transit Station
- Key Entry Points

- A new network of pedestrian and cycling routes offers priority to active modes through dedicated routes, separated lanes on shared routes and streetscape approach meant to increase comfort and reduce speeds.
- The proposed mobility network is structured by curvilinear connections designed to integrate with the topography and to create direct and continuous links to existing mobility networks.
- Access to each quadrant is provided for vehicles and servicing, while discouraging through traffic. Connections between quadrants are provided for pedestrians and cyclists of all ages and abilities.
- A diagonal green spine is the central element of the mobility network and acts as an active modes corridor for all users.
- A potential future transit station is situated centrally for convenient access. Connections for passenger pick-up and drop off are provided from both West 4th and West 8th Avenues.

LAND USE

Legend

- Park & Open Space Network
- Residential
- Community Amenities
- Cultural Spaces
- Mixed-Use (Retail/Residential)
- Mixed-Use (Office/Retail/Residential)

- A broad range of uses and activities are proposed to be integrated across the site:
 - Commercial spaces are concentrated at the east end of the Diagonal, along a pedestrian walkway, enhancing existing commercial activities on West 4th Avenue.
 - A combination of commercial, retail, and office spaces is located in the northwest quadrant, supported by the potential location of a potential future transit station.
 - Residential development is integrated with other land uses throughout the site and is concentrated near retail and a mixed-use urban plaza.
 - Key community amenities and cultural spaces are located in close proximity to the central gathering space, existing natural area and playing field, creating a community hub and supporting intergenerational gathering and learning as well as synergies between indoor amenities and the outdoors.

BUILT FORM (BUILDING TYPES AND HEIGHTS)

Legend

- Low-rise (up to 5 storeys)
- Medium-rise (up to 15 storeys)
- Medium height towers (up to 23 storeys)
- Tall buildings (up to 32 storeys)
- ⊛ Sentinel Buildings

* The Sentinels are intended to be iconic and visually distinct. The buildings are illustrated at up to 38 storeys to be refined through further study.

- The built form follows the topography of the land and harmoniously integrates into the ridge and with other natural elements.
- Taller buildings are concentrated around two main focal points; the community hub and mixed-use urban plaza to the west and the retail heart and residential core on the east portion of the site.
- Building heights rise toward the centre of the site with a terraced approach to massing, transitioning down toward the residential area and proposed parks, and minimizing shadow impact on public spaces.
- The "sentinel" buildings, three iconic towers that form the architectural focal point of the site, slope upward from the land reflecting the partnership and stewardship of the MST Nations. The sentinel buildings are uniquely oriented to frame and enhance views to the city, mountains and natural landscape while allowing for views to and through the site.

SUN & SHADOW ANALYSIS

Equinox - March 21st

Summer Solstice - June 21st

Winter Solstice - December 21st

Łən · tahím tl'a úxwumixw-chet · weave

THE CONCEPT

The Weave concept is defined by a fine-grained network of streets and blocks, anchored by three distinct neighbourhood hearts. An east-west central spine connects the hearts and prioritizes active transportation with a series of social spaces and community amenities.

Pedestrian and cycle routes link gathering spaces and rainwater features, and connect on-site destinations, a potential future transit station, and surrounding neighbourhoods and open spaces. Four primary street "loops" concentrate vehicular traffic away from central gathering spaces, while shared slow streets support bus and local north-south movement.

Taller buildings are proposed to be located on the eastern (lower) portion of the site, balanced by courtyards, open spaces and gathering places, and at the Community Heart located on the western portion of the site. Building heights transition down toward the site edges and existing neighbourhoods.

Łən · tahím tl'a úxwumixw-chet · weave

THE BIG IDEAS

Interwoven network of connections

A fine-grain network of interconnected corridors and intersections weave the site into the landscape and surrounding context and knit together a fabric of distributed social spaces, encouraging the intersection of mobility, gathering and activity.

Central east-west spine

A central east-west corridor aligns with West 6th Avenue to provide a link from the neighbourhood to the east, to a series of key spaces on the ʔə́yalməxw/Iýálməxw/Jericho Lands site, and westward into Trimble Park and the West Point Grey neighbourhood, and 10th Avenue high street to the west.

Three distinct hearts

Three community 'hearts' of different character offer key nodes of activity through co-locating community gathering with retail and services (**Village Heart**); combining recreation, public amenities, and commercial activity adjacent to potential transit (**Community Heart**); and celebrating the relationship between nature, culture and community (**Nature Heart**).

Connect 4th to 8th

North/south connections through the site offer strong linkages between West 4th and West 8th Avenues and beyond, helping to knit the site into the existing fabric of Jericho Beach Park and the surrounding neighbourhoods: active transportation links adjacent to the central park and from Alma to Jericho Beach; a slow street connection through the Village Heart; and transit connections from north and south to the potential future transit station.

Longhouse-inspired amenity spaces

The spirit of the traditional longhouse form inspires the location of shared communal spaces within fine-grained development blocks, within open spaces, courtyards, or through built form.

New 4th Ave water "front" edge

The cultural importance of the connection between water, the Salish Sea and the site is reflected in linear water features along West 4th Avenue and through the integration of rainwater in an urban plaza that celebrates arrival at ʔə́yalməxw/Iýálməxw/Jericho Lands at West 4th Avenue and Highbury Street.

Skyline: Varied Heights

Varied heights are woven throughout the site. Three iconic "sentinel" buildings mark the Community Heart.

Framing and Transitions

Building heights transition down around parks, the Village Heart and the central spine. Public spaces are framed by buildings; small buildings frame small-scale spaces.

PARKS AND OPEN SPACE

Legend

- Park & Open Space Network
- Courtyard Spaces
- Rainwater Management
- Existing Trees
- Proposed Trees

- The open space network includes approximately 20 acres of passive and active parks woven throughout the site at a range of scales, integrated with water sensitive urban design, and a fine-grained network of pedestrian and bicycle paths.
- The ridge and significant existing trees are celebrated on the west side and a portion of the existing natural area is retained, enhanced and managed.
- Several key open spaces are co-located with active uses and amenities in the neighbourhood hearts:
 - Village Park: a lively urban park surrounded by retail and services;
 - Nature Hub: a large park and open space extending from West 4th Avenue to West 8th Avenue with space for passive greenspace, cultural programming and community agriculture at the edge of the existing natural area;
 - Community Plaza: a neighbourhood plaza and wetland located adjacent the potential transit station and playing field.
- An open space network links the southeast corner of the site to Jericho Beach Park, and lines the north edge of the site along West 4th Avenue, including a plaza and rainwater gardens that create a West 4th Entry at the northeast.

MOBILITY NETWORK

Legend

- Local Street Network
- Pedestrian Priority Streets
- Primary Pedestrian Route
- Secondary Pedestrian Route
- Primary Cycling Route
- Other Cycling Routes
- Potential Transit Station
- Key Entry Points

- Active modes are prioritized through clear links between key on-site destinations and connections to existing routes. The east-west central spine serves as an active modes corridor, accommodating all ages and abilities and linking a range of proposed amenities.
- The proposed mobility network aligns seamlessly with surrounding streets and features tightly knit connections across the flatter east half of the site; curving east-west streets are proposed on the steeper western portion.
- Limited north-south vehicle movement is proposed on the east half of the site; transit-only connections are provided north-south to the centrally positioned potential future transit station.
- Key vehicular access points are located on West 4th Avenue for both east and west portions of the site, while minor access points are provided off Highbury Street and West 8th Avenue.

LAND USE

Legend

- Park & Open Space Network
- Residential
- Community Amenities
- Cultural Spaces
- Mixed-Use (Retail/Residential)
- Mixed-Use (Office/Retail/Residential)

- A mix of land uses is proposed across the site, with a focus on co-location of complementary uses:
 - Residential uses are integrated throughout the development, framing shared social spaces and other active uses.
 - Commercial uses and open space make up the Village Heart, providing retail, services and a community gathering space. Small scale commercial spaces are located at the West 4th Entry, building on existing commercial uses along West 4th Avenue. Discrete retail spaces also mark the SW and SE entry points.
 - Community amenities are co-located with the playing field within the Community Heart to support synergies between public amenities and the outdoors.
 - Cultural spaces (art, nature, food security, education) are located adjacent to an enhanced natural area and central park within the Nature Heart, combining a focus on Indigenous knowledge, gathering spaces, and food security.
