TYPICAL SMITHE STREET UPGRADES CROSS-SECTIONS

Proposed

- Convert north travel lane to a two-way protected bike lane
- Add a buffer of planters or concrete to separate the bike lane from traffic.

Existing

SMITHE STREET UPGRADES
(Richards St to Thurlow St)

The City of Vancouver is planning to improve active transportation along Smithe Street (Richards Street to Thurlow Street). The proposed upgrades will:

- ✓ Close a **major gap** in the existing bike network by providing **an east-west connection** between the West End and Cambie Bridge.
- ✓ Create safer intersections for everybody through **protected intersections.**
- ✓ Be delivered using **a quick-build** approach to minimize impacts.
- ✓ Maintain **sufficient vehicle capacity** for pre-COVID volumes.

PROVIDE YOUR FEEDBACK

We are collecting public feedback from local businesses and the public on the proposed design. The feedback will be used to refine the design and inform implementation.

SUBMIT YOUR FEEDBACK BY JUNE 7, 2021
