Davie Village: Jervis St to Bute St

This proposed design aims to...

Provide more space to stroll

Wider sidewalks: Increased from 1.8m up to 2.8m (or more), so we can all walk together side by side.

Supporting pedestrians with different levels of mobility: Sidewalks are smooth and level. Benches to stop and rest, are regularly spaced along the sidewalk.
Accessible parking space outside the pharmacy and dentist.

Support local businesses

Space for more patios: Outdoor patio space in front of business doorsteps.

More comfortable shopping: Space outside stores to display goods, without blocking walking space.

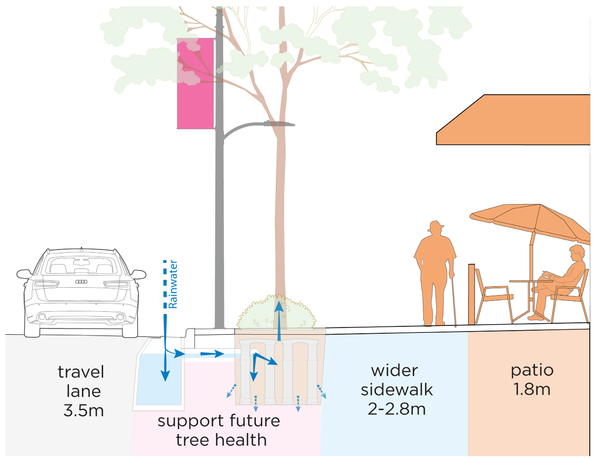

Pick-up and drop-off spots outside businesses like the grocery store, pharmacy and dentist.

Make Davie welcoming & vibrant

Small pop-up event spaces for community events and activities.

Support future tree health: More root space for healthier trees that give shade in summer and shelter in winter. Rainwater collection under the sidewalk.

Davie Street could look like...

Davie Village: Space for people
